Subject: Public Consultation of the Draft NNGS Development Plan 2023-2032

Dear Sirs,

Edison welcomes DESFA's Consultation Process and appreciates the possibility of submitting its own comments regarding the Development Plan of the National Natural Gas System 2023-2032.

As you know, Edison carried out all the necessary formalities to be able to operate on the market in the near future. For this reason Edison hopes that all the necessary investments will be made in order to overcome the current bottlenecks of the DESFA network and to promote a full and constant use of the infrastructures currently under construction in the country, allowing Greece to become a true gas hub and allow a real interconnection with other countries.

Kind Regards
Evelina Carminati
